Official fuel consumption figures for the Jeep, Grand Cherokee 4xe: CO₂ emissions (weighted, combined) (g/km): 62. Fuel consumption (weighted, combined) (l/100 km): 2.6; Electric energy consumption (ECAC weighted, combined) (kWh/100 km): 25. Values calculated with the WLTP procedure (EU Regulation 2018/1832). The values indicated for fuel consumption and CO₂ emissions are measured by the manufacturer on pre-approval tests, according to the WLTP procedure (EU Regulation 2018/1832), and may be subject to modification depending upon the definitive homologation. These figures were obtained after the battery had been fully charged. The Grand Cherokee 4xe is a plug-in hybrid vehicle requiring mains electricity for charging. Figures shown are for comparability purposes. Only compare fuel consumption, CO₂ and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

Jeep, is a registered trademark of FCA US LLC. Prices, fuel consumption and CO₂ emission figures are correct as of July 2023 and published to our dealer network which may be subject to change. Colours of vehicles shown may not match the actual colour.
