PROTECTING YOU AND YOURS

Safety is paramount. A shock absorbing crash zone protects passengers, the Ultra-rigid Quad frame delivers unsurpassed safety, and the exterior is designed to minimise injuries to pedestrians.

SAFETY

Advanced high-strength steel construction

The new Rexton is built on extremely strong foundations. Its body-on-frame construction is built using 1.5Gpa ultra-strength steel. In fact, 81.7% of the steel in the car's body uses high-strength, high-density, high-tensile steel.

Trailer sway control

Driving stability is improved by automatic detection and stabilisation when the trailer begins to yaw or sway.

9-airbags

For maximum passenger protection on impact, the car is equipped with 9-airbags. The most in its class.

SMART SAFETY

Autonomous Emergency Braking

When a frontal collision is anticipated, this function automatically applies the brakes to prevent a collision.

Front Vehicle Start Alert

The system warns the driver when the front vehicle begins to move forward from a still position.

Smart High Beam

Lane Change-Collision and Blind Spot-Detection

Detects vehicles rapidly approaching from behind and flashes a warning light on the outside mirror, to alert the driver.

Rear Cross Traffic Warning

By using rear-corner radars, the system helps to prevent backing into cross traffic by alerting when vehicles are detected.
