---

## STYLE

---

The new Korando gains a fresh look with a purposeful theme. The front end is enhanced by a new grille, projector headlamps with daytime running lights, a new front bumper incorporating stylish foglamps, a new bonnet line and some elegant 18" diamond cut alloy wheels on ELX models.

True to the original design of Italian legend Giorgetto Giugiaro, the new Korando remains a true blend of Italian form and Korean function. It all adds up to giving Korando a true SUV style which adds to its reputation for no-nonsense service whether towing, driving off-road or just getting on with the essentials of life.

The 2.2 litre diesel engine has taken Korando's performance to new levels - with 400Nm of torque from just 1400 rpm, this proven engine gives great driving flexibility and towing ability. And with great fuel economy and low emissions Korando 2.2 litre adds efficiency to strong performance.

Korando is noted for its generous levels of standard equipment and 5 year limitless mileage warranty and the new Korando is no different. SE models feature alloy wheels, cruise control, puddle lamps (on the heated door mirrors), roof rails, front fog lights and a high-grade audio unit as standard, whilst ELX models now add a heated steering wheel, auto lights and wipers and front parking sensors to an already impressive specification.

It all adds up to make Korando the best value vehicle in its segment from the Korean brand that knows SUV's the best with a heritage dating all the way back to 1954.

---

---

## ELEGANT & PRACTICAL

---

The hallmark of Korando is its elegant, practical yet comfortable interior. The updated fascia is modern and ergonomic with the high mounted audio unit easily visible and heater/air conditioning and driving controls that fall easily to hand.

Korando offers the space and flexibility for anything you may need to transport – from 5 adults to a range of sporting or outdoors equipment. The rear seat fold flat and can be split 60/40 to accommodate awkward loads, the rear load space is also flat making loading straightforward, and with a hidden underfloor luggage tray for valuables.

## CONTEMPORARY INFOTAINMENT

Korando SE has a high quality six speaker audio with iPod and Bluetooth connectivity and steering wheel controls. Korando ELX upgrades to a stylish 7" touchscreen with TomTom navigation and rear-view parking camera to give the best in contemporary infotainment.

## OTHER FEATURES

## REAR SEAT FLEXIBILITY

With room for 3 adults due to generous width, shoulder and head room Korando treats its rear seat passengers well. Top models feature a centre armrest which adds comfort when there's fewer passengers and there's even a recline feature for the 60/40 split backrest to bring a little more comfort to longer journeys on all models.

## STEERING WHEEL

The new steering wheel sets off the driving experience with a chunky feel and a range of controls at your fingertips - leather covered and heated for those winter days on ELX models; the new wheel offers the best in comfort and control.

## HEATED SEATS

Korando ELX features heated seats in the front and rear – it can get pretty cold in Korea and it's nice to offer rear seat passengers the same warming and indulgent experience as those in the front!

## FLAT REAR FOOTWELL

We all remember journeys when being consigned to the middle of the rear seat was not to be taken lightly. Korando features a flat rear floor (even with 4x4) that consigns such problems to the past – and adds the added benefit of a discreet loadspace when the rear seats are folded.

---

## D22T ENGINE

---

Designed to meet tough Euro 6 emissions standards and built in our factory in Changwon Korea, SsangYong has developed a more powerful and efficient turbo diesel unit using contemporary technologies.

---

---

## POWER TO PERFORM

---

Korando's new 2.2 litre diesel engine is clean, efficient and powerful. It develops 178PS @ 4000rpm and 400Nm of torque between 1400 and 2800rpm giving a wide spread of power – enough whether towing, off-roading or heading to the supermarket.

In towing, numbers certainly tell the true story – Korando's sturdy construction and strong engine performance give a 2 tonne towing capacity across the range. With kerb weights of between 1725 and 1775KG Korando offer caravaners an 85% ratio of over 1500 KG – enough to tow most vans with comfort.

---

---

## 6 SPEED MANUAL OR AUTOMATIC GEARBOX

---

Korando offers either a 6 speed manual gearbox well matched to the 2.2L diesel engine or an 6 speed automatic made by Japanese transmission experts Aisin which is used in SsangYong's Tivoli, BMW's MINI and several Peugeot models. The auto features a choice of electronic programmes for normal driving, increased performance and winter modes.

---

---

## ACTIVE SAFETY

---

Korando is equipped with a host of modern technology to assist the driver to avoid accidents.

### EBD — ABS

ELECTRONIC BRAKEFORCE DISTRIBUTION  
ANTI-LOCK BRAKE SYSTEM

Brake force is distributed appropriately to the front and rear wheels according to the vehicle's load of persons and/or cargo.

### ESP

ELECTRONIC STABILITY PROGRAMME

The electronic stability programme monitors road conditions and vehicle status constantly, adjusting engine output and braking whenever the driver is about to lose control. The ESP integrates the anti-lock brake system, active rollover protection, anti-slip regulation and brake-force assist to improve Korando's intervention capabilities.

### HSA

HILL START ASSIST

Korando's Hill Start Assist is a great ally either when driving solo in tricky conditions or when towing – it acts like an automatic handbrake to prevent rolling backwards during a hill start.

### ELECTRONIC ACTIVE HEAD RESTRAINTS

Head restraints on driver and front passenger seats are electronically activated to mitigate whiplash in the case of impact.

---

## PASSIVE SAFETY

---

### AIRBAGS

Korando is equipped with 6 airbags for maximum passenger protection on impact – driver and front seat passenger are protected by front and side airbags with rear passengers being protected by side curtain airbags.

### ISOFIX

Korando is equipped with ISOFIX child seat mountings to the rear outer seats to provide firm and rigid attachment of child seats.

### SEATBELT PRE-TENSIONERS

In the event of a collision, the pre-tensioner immediately tightens the seatbelt over the chest and lap, ensuring the occupant is in the best possible restrained position if the airbags are deployed.

---

## TORQUE-ON- DEMAND 4X4

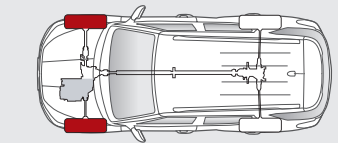

---

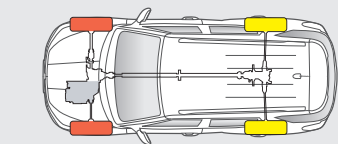

Korando features an advanced 4x4 system that operates in two modes depending on conditions and settings.

In auto mode and normal conditions, Korando remains in two wheel drive to optimise fuel efficiency. When sensors detect a potential loss of grip, the system progressively engages the four wheel drive mode.

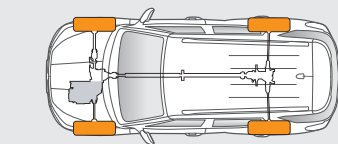

For extreme loose or slippery surfaces, the 4x4 system can be locked to allocate drive equally between front and rear wheels. This provides supreme grip and control for low-speed manoeuvres.
